

Data Scientist - Healthcare & IOT

Dele Health is on a mission to save lives through fall prevention, and prevent one million falls by 2024. Learn more at: <https://delehealth.com/about/>

We are seeking experienced Data Scientists to join our team. In this role you will analyze sensor and related health care information to predict falling likelihood, identify correlating factors and ultimately develop new algorithms and analytics that help prevent falls.

Experience with sensor/movement data, MQTT, Kafka, Mongo, Elasticsearch, stream processing with Spark, working with PHI data and choice of data science tools. Ideal candidates will have a strong background in data preparation, experience with DataBricks, image/video/movement processing using Tensorflow or similar, exposure to Deep Learning, experience extracting unstructured information from medical information using large language models like BERT etc.

Candidates should have at least 5 years of hands-on data science in a startup, cloud environment, with excellent written and verbal communication skills.

We offer 100% remote work, excellent compensation and benefits, including matching 401k plan. If you're looking for the opportunity to bring the above data skills to a venture that is truly focused on making people's lives better, we'd love to hear from you!
